Summary

Software engineer with **2+ years** of hands-on **software development** experience across **Python**, **FastAPI**, and SQL-based systems, with a track record of building and integrating services, optimising performance, and delivering full-lifecycle solutions. Comfortable owning features end to end, from **design** and **development** to **testing** and **deployment**, and communicating clearly across technical and non-technical teams. Currently completing an MSc in Data Analytics at TUS. Eager to contribute to high-availability, microservice-based products in a collaborative agile environment.

Skills

- **Development & Platforms**: Python, FastAPI, Java, Linux/Windows, REST APIs, Git, CI/CD (basics), PyTorch, Computer Vision (YOLO)
- **Systems & Data**: Data Flows, System Interfaces, SQL, MySQL, PostgreSQL, Oracle, Data Pipeline Design
- **Analysis & Tooling**: Power BI, MS Excel, R, Data Modelling, Dashboard Development
- **Collaboration**: Agile Teamwork, Technical Documentation, Cross-functional Collaboration, Problem Solving

Experiences

Software Engineer, *Cattleya Technosys* 06/2023 – 04/2025 | Banglore, India

- Designed and delivered **Python**-based services **end to end**, mapping data flows and improving operational efficiency by **18%** for clients.
- Integrated **FastAPI** into existing systems, accelerating data processing by **25%** and improving **interface performance** across services.
- **Built and optimised SQL queries** for large datasets across complex, multi-source environments, with attention to **reliability** and correctness.
- Produced and maintained **technical documentation** across the **project lifecycle** for both engineering teams and non-technical stakeholders.

Data Analyst, *Trainity* 01/2023 – 05/2023 | Remote

- Used SQL to extract and filter key data from company databases, supporting specific analysis projects and report generation needs.
- Cleaned and analysed data in Excel, finding important business trends and **improving data readiness** for reporting by **20%**.
- Applied Python for data manipulation and automation, helping to **improve data preparation time** by about **15%** for reporting.
- Designed and **built data dashboards** as per customer needs, helping them see important information clearly and quickly for decisions.

Education

MSc in Data Analytics 09/2025 – 09/2026 | Athlone, Ireland
Technological University of the Shannon

BE in Computer Science 07/2018 – 07/2022 | Kerala, India
APJ Abdul Kalam Technological University

Projects

Gym Tracker - Full-Stack Workout Tracking App (Personal Project) ,
Flutter, FastAPI, PostgreSQL, Render, Neon

- **Owned** a full-stack application **end to end**: designed a **REST API** over **PostgreSQL**, built the client, and **deployed** both to cloud hosting with a **Git-based workflow**.
- **Diagnosed and resolved a production** outage from deployment logs, tracing it to an expired database instance and migrating to a persistent provider with no data-model changes.
- Applied a **data-driven**, iterative approach to **reliability**, adding request retries and warm-up handling for cold-start latency, and running a safe live **schema migration**.

Certifications

- Coursera Google Data Analytics Professional
- Trainity Certified Data Analyst
- Udemy Certified Python Programmer
